

Matson, Inc. Foundation Excellence Award

Established in 2021 by Matson, Inc.

The Matson Inc. Foundation Excellence Award was created to support underrepresented students at Texas A&M-Galveston. In creating the scholarship, Matson hopes to create a more diverse workforce by increasing opportunities for minorities and women to become leaders in the ocean shipping industry.

Matson is a U.S. owned and operated transportation services company headquartered in Honolulu, Hawaii. As a leader in Pacific shipping since 1882, Matson serves as a vital lifeline to the economies of Hawaii, Alaska, Guam, Micronesia and the South Pacific.

By removing financial burdens for underrepresented Aggies by the Sea, the company hopes the award will help minorities and women become the leaders that the transportation services industry needs to create a more equitable future. Matson's next generation of leaders are being trained today at Texas A&M-Galveston, and the company looks forward to investing in their success.
